

Engineering Structures for Life

BUILDINGS - SPORTS FACILITIES

Stadium of Zurich

ABOUT

GEG was responsible for the conceptual design of all the [engineering disciplines](#), under the short list international competition for the Stadium of Zurich.

The stadium has a capacity of 19.500 seats for national games and 16.000 seats for international games.

The project had a [strong sustainable focus](#) and aimed to contribute to the 2000-watt society goals. On this purpose solar cells were located in the roof.

FACTS

Year: 2011-2012
